第3問

I agree with the idea that students should continue to play sports or music. I think so for two reasons. First, it is a very good change of pace. No one, especially teenagers, can concentrate on one thing for hours, and I myself feel refreshed and energized after I jog. Second, a recent study shows that getting some exercise contributes to a good memory. Since we have so many facts and figures to memorize, it is worth faithfully carrying out the result of the research.
